Education

2021–2027 **B.S. in Electrical and Computer Engineering**, *Seoul National University*, Seoul, Korea
(Expected) Expected Graduation: February 2027

Selected Publications

- 2026 **ICRA 2026 (2nd Author)**, *Adaptive Capacity Allocation for Vision Language Action Fine-tuning*
Contributed to experiments, implementation, and data pipeline for VLA-based robotic control.
- 2026 **CoRL 2026 Submitted (1st Author)**, *HeLM: Hierarchical Explicit Language Memory for Non-Markovian Manipulation*
Proposed hierarchical VLA framework with language memory; Achieved 13% success rate improvement in real-world non-Markovian tasks.

Research Experience

- 2024.12– **Undergraduate Research Intern**, *SNU ISLAB*, Seoul, Korea
- 2026.3
 - Designed and implemented data collection pipelines for real-world robot learning using Realsense cameras and ROS.
 - Collected 3000+ trajectories and fine-tuned multiple VLA models including OpenVLA, Pi0, ACT, and SmolVLA.
 - Managed distributed training infrastructure on multi-GPU clusters using DDP/FSDP.
- 2026.4– **AI Research Intern**, *RLWRDL*, Seoul, Korea
- Present
 - Developed hierarchical approach on VLA models targeting memory requiring tasks.
 - Conducted experiments on long-horizon and language-conditioned robot control policies.

Technical Skills

Programming Python, C/C++, MATLAB

ML PyTorch, Distributed Training (DDP/FSDP), LLM/VLM/VLA Fine-tuning

Robotics ROS2, RealSense SDK, RLDS/Lerobot Datasets, Robot Arms (AgileX Piper, SO101)

Tools Linux, Git
